The following factors have been considered for determining the materiality of Risk Factors:

For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 3 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. Our present promoter of the Company is first generation entrepreneur.

Our present Promoter is first generation entrepreneur. His experience in managing and being instrumental in the growth of our Company is limited to the extent of his knowledge and experience and we cannot assure that this will not affect our business growth. However, though the promoter is first generation entrepreneur, he is able to get on board well-known brands. The promoter has a good track record of delivering the services to the satisfaction of customers.

2. Our Company depends on brands recognition and reputation and our ability to maintain or enhance brands image that we operate could have a material adverse effect on our business, financial condition and results of operations.

Our Company and our subsidiaries have entered into brands agreements for international lifestyle wellness brands, like L'Occitane, ELLE, Spa by Clarins, Warren Tricomi Salons, Levo, Rossano Ferretti, TAOS, Nouveau Lashes for territories such as and within India, the Middle East, Indian Ocean & USA. We are also developing our own brand named MyHomeFitness, where the training programme is provided by well known Hollywood fitness trainer Ramona Braganza. We believe that the recognition and reputation of brands among consumers has contributed significantly to the growth and success of our business. Maintaining and enhancing the recognition and reputation of brands are, therefore, critical to our business and competitiveness. Many factors, some of which are beyond our control, are important to maintaining and enhancing brand. These factors include our ability to: maintain the popularity, attractiveness and quality of the services and products we offer; maintain or improve consumers' satisfaction with our services; and increased brand awareness through investment in brand building initiatives, including through social media and marketing activities. Our consumers that use and recommend our services have come to expect a high level of efficacy and quality from our services and products, and our failure to deliver on that expectation could adversely impact our brand and reputation. As we expand into new geographic markets within India and overseas, and as the market becomes increasingly competitive, maintaining and enhancing our brand image may become increasingly difficult and expensive. In addition, novelty of brand in these new geographic markets may diminish over time. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our services, which could have a material adverse effect on our business, financial condition and results of operations. However, we have understood that a brand functions as a multiplier for us. It generates desire and differentiation and motivates consumers to pay more for our services & products than they might otherwise. So, while we have build brands in order to get the most return from them, we also protect our reputation in order to preserve credibility and trust.

3. Our reliance on brands expose us to additional risks and uncertainties in our business, including in the event we are unable to extend brands in the future.

As we plan to expand our footprints in India and abroad through brands, we rely on our terms & conditions of our brand agreement. We cannot assure you that brands will not terminate the agreement due to some deficiency in our service standards or otherwise, which could negatively impact our business, prospects, financial condition and results of operations Further, there is a possibility that our master agreement is not renewed on due date. However, we strive to maintain a balanced portfolio of brands to hedge our risks on this account.

4. Failure on our part to meet consumer expectations could impact our business operations.

Spa, salon and Fitness services are discretionary and often perceived as luxury services. Our business depends on consumer preferences which cannot be predicted with certainty and are subject to rapid changes. We feel that if we are unable to respond in a timely and appropriate manner to changing consumer demand with quality products and

services, our brand name and brand image may be impaired and in turn result in decline in sales. In addition, it cannot be assured that any new products or brands that we introduce in future will be successful. If we are unable to successfully meet consumer demand or preference, it may negatively affect our business, financial condition and results of operations. However, we have continuous proper training programme with our operation team to ensure changes in the industry and consumer psychology is captured during the training programme to develop and implement such change practices in our spa/ salon and fitness programmes and centres.

5. ***If we were to lose the services of members of our senior management team, our business and prospects may be adversely affected. Moreover, our failure to attract, motivate and retain sufficient skilled personnel may adversely affect our business, results of operations, financial condition and prospects.***

We believe that the inputs and experience of our senior management are valuable for the development of business and operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, please refer chapter titled “Our Management” beginning on page 150 of this Draft Prospectus. There is no assurance, however, that these individuals or any other member of our senior management team will not leave us or join a competitor for, in the future.

As of August 31, 2017, we had 252 full time employees with our Company and our Subsidiaries. Our future success depends in substantial part on our ability to recruit, hire, motivate, develop, and retain talented and skilled personnel and our senior management. Further, we cannot assure you that we will be able to retain our employees or find adequate replacements in a timely manner, or at all. Achieving this objective may be difficult due to many factors, including fluctuations in economic and industry conditions, shortages in skilled personnel, competitors’ hiring and retention practices, new entrants into the market, and the effectiveness of our hiring, compensation and retention programs. If one or more of our Key Management Personnel or other qualified personnel were to leave their present positions or were to take a prolonged leave of absence, we may not be able to replace them on a timely basis. If we do not succeed in retaining, training and motivating our existing employees, including our senior management personnel and in attracting and training new personnel, our business, results of operation, financial condition and prospects may suffer. However, to mitigate these risks we have been including a clause in most of the employee contracts where employee cannot share our knowhow or training or expertise with a competitor.

6. ***Our management and operating agreements with Business Partners for providing our services at their premises expose us to operating risks and uncertainties in our business.***

We enter into management and operating agreements with Business Partners & Others for providing our services & products at their premises for a specified period of time. We rely on local expertise and the decision-making of our business partners. We aim to ensure a uniform service experience and consistent high-quality consumer service across all our business partners’ premises. At the same time, we give our business partners a certain amount of autonomy to make use of their local knowledge and expertise to develop our business and they also contribute towards the end-consumer's service experience. While our endeavour is to ensure that our business partners comply with high standards of services and integrity, we cannot assure you that our business partners will always maintain these high standards, which could negatively impact our business, prospects, financial condition and results of operations. Also, if we are unable to renew the business agreements, we may have to find new business partner which may not be easy to find and as a result of our operations may be affected. However, our operations team frequently visits every location to ensure all brand partners protocol and normal operating practices are adhered to by the business partners as a basic necessity for our business.

7. *Changes in market trends and consumer preferences and increase in competition that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.*

The industry in which we operate is very sensitive to change as per market trends. Any change in the consumer preference and increase in competition with close competitors will reduce the demand. Also factors such as change in trends and Consumer preference are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences or better services by competitors, and we may be unable to adapt to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects. However, with continuous market survey, training programmes, updates from the industry in which we operate, we try to maintain and reach expectations of consumers to meet market trends.

8. *Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.*

Our revenue and profitability have grown in certain years and are likely to vary significantly in the future from period to period. Therefore, we believe that period to period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our future performance. It is possible that in future our results of operations may be below market expectations, which could cause the share price of our equity shares to decline significantly.

9. *Our top 4 brands contribute 77.87% of our consolidated revenues for the year ended March 31, 2017. Any loss of business from any one or more brands may adversely affect our revenues and profitability.*

Our top 4 brands, L'Occitane, Levo, , Warren Tricomi and Elle contribute 77.87% of our consolidated revenues for the year ended March 31, 2017. Any decline in our quality standards and growing competition may adversely affect our ability to provide services under these brands. We cannot assure that we shall generate the same quantum of business, or any business at all, from these brands and loss of business from any one or more brands may adversely affect our revenues and profitability. However, the composition and revenue generated from these brands might change as we take continuous efforts to provide better services. We intend to retain our relationship with these brands by providing quality services.

10. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

The wellness and spa industry is a high-touch industry where people are the products. Therefore, high demand for the wellness and spa industry requires a greater number of specialized staff with appropriate qualifications. Any employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct or errors. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and business partners may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

11. *We may face claims / liabilities / suits from our clients should they perceive any deficiency in our services or in the event of bodily harm / injury to them while in our salons and spa.*

We believe in providing quality client service and due care is taken while providing services. We attempt to mitigate the associated risks which may happen due to factors beyond our control. However, we may not be able to cover all such risks and may face financial liabilities or loss of reputation, in the event of accidents / mishaps in our salons and spa. While we endeavour to take maximum possible precautions, any mishap, accident during hair and beauty

care procedures, which may or may not lead to personal injuries, may take place due to factors which are beyond our control. Occurrence of such events may have an adverse impact on our business. However, we have taken various insurances to mitigate these risks.

12. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business. We have to update the name of our company in all our statutory approvals and certificates due to the conversion of our company*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

We have regular system of checking for any regulatory license being expiring& to apply for renewal within stipulated time. For further details, please refer to section titled “Government and Other Statutory Approvals” beginning on page 271 of this Draft Prospectus.

Further, we are also in process of availing approvals like PAN, GST, ESIC, PF and other statutory approvals in name of Sanghvi Brands Limited pursuant to conversion of our Company into public limited. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to obtain the required permits or approvals in name of ‘Sanghvi Brands Limited’ in time may result in the interruption of our operations and may have a material adverse effect on our business.

13. *We have not registered our trademark or logo SANGHVI nor have we made any application to register the same. If we are unable to protect our trademark, others may be able to use our trademark to compete more effectively.*

We have neither obtained trademark registrations for our logo nor have we applied to register our logo. We cannot assure you that we will be able to obtain such registrations in a timely manner, in case we determine to apply in the later course of time. As a result, we may be unable to prevent use of these logo/trademark or variations thereof by any other party or ensure that we will continue to have a right to use it. We further cannot assure you that any third party will not infringe upon our trademark, logo and/or trade name in a manner that may have a material adverse effect on our business prospects, reputation and goodwill.

Similarly, we may also infringe the intellectual property rights of third parties in the use of our various trademark/wordmarks in our operations. Although we are not aware of any such infringement by us, there is no assurance that we will not infringe or have not infringed the intellectual property rights of any third party. In the event of any such infringement, we may be subject to our claims or actions and our business, reputation, financial condition and results of operations may be adversely affected.

14. ***Our logo is under the process of registration. In case of no registration our brand building efforts may be hampered which might lead to an adverse effect on our business.***

We have made application dated March 03, 2017 for registration of our Logo/trademark under the Trademarks Act, 1999 for getting the same registered. The status of trademark is objected, A substantial portion of the issue proceeds is to be utilised for expansion of this brand. In case if the trademark is not registered, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks. This could have a material adverse effect on our business, which in turn could adversely affect our results of operations.

15. ***Our Company had negative cash flow in the past 5 years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Our insurance policies cover Commercial General Liability, Fidelity Guarantee, Employee Compensation Insurance, 360* Protector Directors and Officers Liability. The insurance taken by us may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. There can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time by the insurers. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. However, we have taken adequate insurance policies against vulnerability objects that might cause loss to Company being in this industry. For further details on insurance arrangements, see the section titled “Our Business” on page 106 of this Draft Prospectus.

32. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 87 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 87 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

33. *Acquisitions of brands, investments, collaborations and other strategic transactions may result in operational difficulties, dilution and other adverse consequences.*

As a part of our business strategy, we propose to acquire brands, undertake investments in and collaborations with, businesses and companies that operate in our business segment in the India or abroad, whose resources, capabilities and strategies are complementary to and likely to enhance our business operations. 34. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

We propose to utilise the Net Proceeds as stated under section titled "Objects of the Issue". For further details of the proposed objects of the Issue, please refer to section titled "Objects of the Issue" beginning on page 87 of this Draft Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or in ability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoter or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoter or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Draft Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

35. *Our Promoter and the members of our Promoter Group will continue to retain significant control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval. After completion of the Issue, our Promoter and the members of our Promoter Group will hold 52.80% of the equity shares capital of the Company and continue to retain a significant control of the Company. As a result, our Promoter and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoter and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoter and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

36. *The Goods and Services Tax (GST) regimes enacted by the Government of India may have material impact on our operations.*

The Government of India has enacted a comprehensive national Goods and Services Tax (GST) regime that will combine taxes and levies by the Central and State Governments into unified rate structure which has become effective from July 01, 2017. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Though the government is taking necessary steps to guide the impact of GST, we are unable to provide the impact of this tax regime on our operations.

II. Risk related to this Issue and our Equity Shares

37. *Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. There can be no assurance that our Company will be able to pay dividends.

B. EXTERNAL RISK FACTORS

39. *Natural calamities and force majeure events may have an adverse impact on our business.*

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

40. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled "Basis for Issue Price" on page 91 of this Draft Prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

41. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect

the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

42. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

43. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

44. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

45. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

46. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For further details, see the section titled “Statement of Tax Benefits” on page 94 of this Draft Prospectus.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

Overview of Indian Economy

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

Demonetisation had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetisation seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

According to IMF World Economic Outlook Report released on July 23, 2017, Indian economy is expected to grow at to 6.4% during FY 2017-18.

The Q1 2017-18 GDP slowed down to 5.7% as compared to 7.9% on YoY basis and against 6.1% on QoQ basis, showed the data released by the Central Statistics Office (CSO), Ministry of Statistics and Programme Implementation. The Q1 GDP has hit its 13-quarter low.

Q1 2017-18 GVA at basic price at constant (2011-2012) prices for Q1FY18 is estimated at Rs 29.04 lakh crore, as against Rs 27.51 lakh crore in Q1FY17, showing a growth rate of 5.6% over the corresponding quarter of previous year.

Spa Industry Overview

The India's Spa Industry is relatively young by global standards, given that the most spa facilities are just over a decade or two old. Established and emerging spa businesses need to constantly improve their business and management skills, keep up with new changing trends within the industry, and develop good business contacts and partnerships. Access to resources are needed that can assist role players in market research, product to market development, and improving industry standards, professional training and education.

The Indian Spa Industry has raised their voices and has indicated a need to ensure quality spa experiences to all Indian spa visitors. These pioneers recognize the significance of a closer link between the wellness, health and skincare, healing, medicine and spa communities in a sense that will assure a quality experience available to spa visitors. With this voice committed to excellence, Spa industry leaders (including registered health and skincare professionals, licensed health care professionals, spa owners, spa consultants, spa facility designers and product manufacturers) have come together to form The Spa Association of India.

The association members will be professionals with wellness, health and skincare, healing, medicine or spa experience that will work in partnership to develop and implement approaches that will help shape the future of the Indian Spa Industry. The association envisions being an up-to-date association that will encourage its members to blend the worlds of wellness, health and skincare, healing, medicine and spas. The Spa Association of India is dedicated to bring the Day Spas, Med Spas, Hotel Spas, Resort spas, Destination Spas.

SECTION IV- ABOUT THE COMPANY

OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

Overview of Indian Economy

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

Demonetisation had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetisation seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

According to IMF World Economic Outlook Report released on July 23, 2017, Indian economy is expected to grow at to 6.4% during FY 2017-18.

The Q1 2017-18 GDP slowed down to 5.7% as compared to 7.9% on YoY basis and against 6.1% on QoQ basis, showed the data released by the Central Statistics Office (CSO), Ministry of Statistics and Programme Implementation. The Q1 GDP has hit its 13-quarter low.

Q1 2017-18 GVA at basic price at constant (2011-2012) prices for Q1FY18 is estimated at Rs 29.04 lakh crore, as against Rs 27.51 lakh crore in Q1FY17, showing a growth rate of 5.6% over the corresponding quarter of previous year.

Spa Industry Overview

The India's Spa Industry is relatively young by global standards, given that the most spa facilities are just over a decade or two old. Established and emerging spa businesses need to constantly improve their business and management skills, keep up with new changing trends within the industry, and develop good business contacts and partnerships. Access to resources are needed that can assist role players in market research, product to market development, and improving industry standards, professional training and education.

These pioneers recognize the significance of a closer link between the wellness, health and skincare, healing, medicine and spa communities in a sense that will assure a quality experience available to spa visitors. Spas expand northwards

India has one of the fastest growing spa markets in the world. This sector has shown a steady growth and continues to get bigger with an 8% CAGR Year on Year. Increase in disposable income, flourishing tourism and the rise of Ayurveda are some of the top factors that have contributed to the growth of the spa business in India.

The southern states of Kerala and Karnataka dominate the spa industry of India as Ayurveda has strong roots in these two states. However, some of the best spa experiences remain in the North. In fact, spa leaders in the southern regions of India, like Kairali, Adara and Keva, are now looking at growth in the northern regions like Himachal Pradesh, Uttarakhand etc. scouting for franchisees in these areas. This points at the spa market spreading across India than being restricted to one part of the country.

Currently valued at Rs 137 billion, the Indian Spa Industry is estimated to grow to Rs 510 billion by the year 2018, according to a report. With the beauty service industry growing rapidly in India, the spa segment in India is also attracting a lot of attention. The spa industry over the last five years has shown tremendous growth, not only in the number of spas open, but also in the diversity of spas and products available.

2. Lifestyles and Demographics Fuel Growth.

The growth of the market is factored due to the lifestyles, tourism, rising demand from teenagers and the improvement of the standard of living. Also, the rising popularity of working women and male Consumers interested in spa services is causing the spa industry to offer more services. Even though there is a desire for more services, there isn't enough manual labor to handle the demand. Indian Beauty and Grooming market

The market size of India's beauty, cosmetic and grooming market will reach \$ 20 billion by 2025 from the current \$ 6.5 billion on the back of rise in disposable income of middle class and growing aspirations of people to live good life and look good, according to Assocham. To suit consumption across different levels of purchasing power, FMCG companies are coming out with variety of products in different price range.

The rural population too is joining the mainstream with improvement in linkages with the cities by roads, telecommunication and the firms reaching out to the people in villages and small towns. That is how it should be, said D S Rawat, secretary general, Assocham.

The consumption pattern of cosmetics among teenagers went up substantially between 2005 and 2015 because of increasing awareness and desire to look good. In fact, this product category is among the fastest growing segments for the manufacturers of a range of products including body sprays. Over 68 percent of young adults feel that using grooming products boost their confidence.

About 62 percent of young consumers in big cities prefer to buy online beauty and grooming products whereas, 45 percent of consumers tend to buy cosmetic, apparel items from any shop of their convenience rather than a single shop. Both quality and value for money is being sought by consumers.

Brands such as L'oreal, Lakme, Maybellene, Nivea and Color Bar are being pushed as mass market products and focus on younger women and women with lower buying power, noted the Assocham paper. While these are little expensive products, the price barriers are also being broken both by the consumers and the manufacturers.

The herbal cosmetics industry is also driving growth in the beauty business in India and is expected to grow at a rate of 12 percent. The Indian cosmetics industry has a plethora of herbal cosmetic brands like Forest Essentials, Biotique, Himalaya, Blossom Kochhar, VLCC, Dabur and Lotus and many more.

There is a rising aspiration among Indian men to look better groomed, which has led to the Indian men's grooming market's rapid growth of more than 42 percent in the last 5 years. The study further showed that this growth is faster than the growth rate of the total personal care and beauty industry in India. Additionally, as more Indian men are looking to remain competitive in the workforce, they are seeking products to help them maintain a youthful look.

"Interestingly, men who fall in the age group of 18 to 25, spend more money on grooming and personal care products than women in India. The aspirations and requirements of today's young Indian men are rapidly evolving. With a surge in disposable income, men are becoming more discerning and indulgent. In an evolving trend in India, men are beginning to look at innovative grooming and personal care products created specifically for them," highlighted the Assocham study.

There has been sharp increase in number of beauty salon and spa in the country. It is estimated that about 25-30 percent of total salon business come from men's treatment.

Fitness Market Overview

Today fitness industry in India, is chiefly driven towards health, well-being, good looks and confidence. Resistance training, aerobics, Zumba, aerial yoga, Pilates, MMA, kickboxing etc. have become the fitness trends over a few years in India.

However, the fitness industry in India is largely an unorganized, fragmented and unstructured sector, waiting to be consolidated into an organized entity. More recently, it has been witnessed that many mom-and-pop structures are making way for organized retailing in the gym business and the trend will only accelerate in the coming times, with the entry of global players, home grown startups as well as online marketplace business models, structured around the gyms and fitness domains- not only fitness services, but also products.

The market is looking up in India. Thanks to today's fast paced, hectic modern lifestyles which seldom allow a person to workout actively or follow a well-crafted fitness regime. Now gyms and fitness studios are on people's smartphones. This has forced many people to do whatever they can to keep themselves fit and active and a healthy diet often tops the set of try-outs. Heart healthy, probiotic, sugar-free, fat-free, low-cholesterol, baked, boiled are some of the lines we see appearing in product packaging these days. Furthermore, muscular and toned bodies of celebrities and fashion icons coupled with healthy lifestyles are making Indian consumers embrace fitness like never before. People are spending quite a sizeable moolah to look and feel good. The trend is encouraging people to take out time from their busy schedules and visit the gym or follow a strict workout routine in the comfort of their homes by taking personal training services. People are coming to terms with the fact that those who exercise regularly are happier and healthier compared to those who don't. Also, regular workouts help in reducing stress, anxiety and depression and keep a host of diseases at bay, including 13 types of Cancer. Strength, energy and stamina are the other immediate clear cut benefits that come with working out regularly.

Market Share

In India, the total retail market for fitness as a category is valued at Rs. 4,579 Cr (US\$ 0.76 bn), growing at 16-18 per cent and is estimated to cross Rs. 7,000 crore (US\$ 1.18 bn) by the year 2017. Modern retail is estimated at 28 per cent of this total market and is expected to grow by 22-27 per cent. There are over 21,000 health and wellness centers across India as of 2014. The market share of top 5 players in India is around 15% compared to 40% in Japan and Singapore and about 20% in China, Australia and New Zealand. Thus the organized players in India have huge scope of consolidation going forward. There is tremendous opportunities for new players to bring brand differentiation, qualified trainers and affordable pricing. Some of the top players in the sector are Talwalkars GYM , Fitness first , GOLD'S GYM , Fitness One and OZONE Fitness & SPA.

Fitness centers are burgeoning as disposable per capita income rises and sedentary lifestyles lower immunity amongst today's youth. Fixation to resistance training increased amongst men and so did aerobics and strength training amongst women. The Indian fitness industry is undergoing a revolution of sorts spiked by the increasing incidences of obesity and diabetes. If we look around, we will find that weight loss advertisements are rampant everywhere. This is one of the key reasons as to why health clubs and gym memberships are growing. Spending on fitness was earlier seen as a luxury, but now it is a way of life. Not just in the urban areas and cities, but also in tier 2, tier 3 cities, towns and even in the villages, where people are increasingly opting for wellness and fitness choices. A preventive approach to healthcare has led to an increase in demand for not just services but also products. Today's health conscious and fitness aware generation wants to look and feel good at any cost; and this is further fueling the overall growth of the fitness resources and services.

Demand from Other Sectors

Global corporations, the ICT industry, BPOs and KPOs specifically, have already provided the impetus to the industry by installing in-house fitness centers and health clubs within their office premises. The hospitality industry is also following the trend. Domestic and international hotel chains have several existing projects in India and many others are in the pipeline. Hotels in smaller cities are providing gyms, if not spas – in order to cater to the demands of the new age health conscious consumers. Couples today are receiving gym subscriptions or even fitness equipment on their weddings as gifts. Community centers in residential societies and even apartment complexes nowadays, invariably hosts a gym. Not just in metropolitan cities, fitness is spreading like wildfire and each tier 2 and tier 3 city is now home to a dozen of gyms and fitness centers. Multinational fitness chains and gyms are taking the franchisee route to enter the Indian subcontinent. Considering India's high and middleclass population, there is ample space in the market for more and more such players. As the competition increases, the possibility of growth is more in the industry.

Small home gyms are also coming up in the houses of business tycoons, industrialists, sport icons, celebrities, socialites and fitness freaks who can afford the price and the space. Now, there are even personalized gyms to meet their specific whims and fancies. There are even online on-demand home services portals and mobile apps which provide gym trainers, fitness experts, and nutritionists etc. for fee.

Also, earlier it was usually the male population who embraced physical fitness. Today, 45% of the members are female. Easy access to the internet, TV and technology have brought about a paradigm shift in perspective of woman taking to

fitness and health seriously. Rising cases of osteoporosis and lowering of bone density have catapulted women to take up health, diet and fitness in a major way. Similarly, breast cancer continues to take lives of millions of women and is in fact the second most common type of cancer among women in India. Lifestyle, good looks, Bollywood and Hollywood celebrity lifestyle influences are some of the other considerable factors. Undoubtedly, fitness industry has great potential in a country like India. It is a sunrise sector, poised to grow by 20-30 per cent year on year.

Rising Consumption Expenditure

India is still a growth story—a big growth story. India's nominal year-over-year expenditure growth of 12% is more than double the anticipated global rate of 5% and will make India the third-largest consumer market by 2025.

Rising affluence is the biggest driver of increasing consumption Of India's five household income categories (elite, affluent, aspirers, next billion, and strugglers), the top two income classes are the fastest growing. From 2016 through
